

A new report, titled "CL Report 09: W-2 Episodes Ending in a Month", has been published in Business Objects.

This report will help agencies identify recent case closures as defined by W-2 Episode End Date, as opposed to end of eligibility period, as well as whether the closure process was manual or automated. This report will also identify the FEP at the time of episode closure.

The purpose of the report is to help agencies identify participants with a case closure in a given month, while also listing all previous and future episodes. Agencies could potentially use this report to reduce creation of new episodes within a month, reducing the negative impacts that might be felt by the participant.

The report is located in the following folder: DCF/Wisdom/Employment Programs/Wisconsin Works/Caseload Reports
